

WORKING MEETINGS DESCRIPTION

The Working Reports record the planning, the organization chart and the progress of the Project during its development:

1. LSX Report

The LSX Report presents the results of the first meeting of the Research Group with the Company regarding the theoretical and research framework of the Project, the organization and the implementation schedule of the deliverables.

2. PO Report

The PO Report: (a) lists the conditions and characteristics of the implementation of digital narratives for the emotional stimulation of visitors and (b) presents the methodology for the implementation of augmented reality technologies regarding the immersive and interactive experience of the user in the virtual museum.

3. FI Report

The FI Report reflects the design for the creation of: (a) software using mobile devices for the interaction of visitors with museum exhibits and (b) software for the development of interactive educational games with museum objects and interactive e-books, according to the principles of recreational learning.

4. EH 360o Report

The EH 360o Exhibition reflects the theoretical and methodological framework for the implementation of the Project, presents its deliverables and evaluates their design and functionality.
